Subject: Terumo Emission Review

Hi Jason,

We're working with David Thayer at CDPHE AQD to review the 2017-2019 air toxics emissions in all of CO and wanted to check in with you about verifying the Terumo emissions over that period. I remember you'd said that there might be additional controls on Terumo but wasn't sure if those were in operation just yet, or if the emissions have changed. We're talking with David this afternoon but it's last minute so I completely understand if you can't make it, but I'll forward the invite in a moment just in case you're free. The main purpose is to just double check that we've got the right emission numbers for Terumo for each of the 3 years from 2017-2019. Thank you in advance for any help you could provide, hope your summer is going well.

Thanks,

Kyle Olson
